

Eat That Frog

BY: Brian Tracy

1

Table of Contents

Preface

Introduction

Chapter 1	Set the Table
Chapter 2	Plan Every Day In Advance
Chapter 3	Apply the 80/20 Rule to Everything
Chapter 4	Consider the Consequences
Chapter 5	Practice the ABCDE Method Continually
Chapter 6	Focus on Key Result Areas
Chapter 7	Obey the Law of Forced Efficiency
Chapter 8	Prepare Thoroughly Before You Begin
Chapter 9	Do Your Homework
Chapter 10	Leverage Your Special Talents
Chapter 11	Identify Your Key Constraints
Chapter 12	Take It One Oil Barrel At A Time
Chapter 13	Put the Pressure on Yourself
Chapter 14	Maximize Your Personal Power
Chapter 15	Motivate Yourself Into Action
Chapter 16	Practice Creative Procrastination
Chapter 17	Do the Most Difficult Task First

Chapter 18	Slice and Dice the Task
Chapter 19	Create Large Chunks of Time
Chapter 20	Develop a Sense of Urgency
Chapter 21	Single Handle Every Task
Putting It All Together	

Thank you for picking up this book. I hope these ideas help you as much as have helped me and thousands of others. In fact, I hope that this book changes your life forever.

There is never enough time to do everything you have to do. You are literally swamped with work and personal responsibilities, projects, stacks of magazines to read and piles of books you intend to get to one of these days *as soon as you get caught up*.

But the fact is that you are **never** going to get caught up. You will never get on top of your tasks. You will never get far enough ahead to be able to get to all those books, magazines and leisure time activities that you dream of doing.

And forget about solving your time management problems by becoming more productive. No matter how many personal productivity techniques you master, there will always be more to do than you can ever accomplish in the time you have available to you, no matter how much it is.

You can only get control of your time and your life by changing the way you think, work and deal with the never ending river of responsibilities that flows over you each day. You can only get

control of your tasks and activities to the degree that you stop doing some things and start spending more time on the few things that can really make a difference in your life.

I have studied time management for more than thirty years. I have immersed myself in the works of Peter Drucker, Alex Mackenzie, Alan Lakein, Stephen Covey and many, many others. I have read hundreds of books and thousands of articles on personal efficiency and effectiveness. This book is the result.

Each time I came across a good idea, I tried it out in my own work and personal life. If it worked, I incorporated it into my talks and seminars and taught it to others.

Galileo once wrote, "You cannot teach a person something he does not already know; you can only bring what he does know to his awareness."

Depending upon your level of knowledge and experience, these ideas will sound familiar. This book will bring them to a higher level of awareness. When you learn and apply these methods and techniques over and over until they become habits, you will alter the course of your life in a very positive way.

My Own Story

Let me tell you a little about myself the origins of this little book. I started off in life with few advantages, aside from a curious mind. I did poorly in school and left without graduating. I worked at laboring jobs for several years. My future did not appear promising.

As a young man, I got a job on a tramp freighter and went off to see the world. For eight years, I traveled and worked, and then traveled some more, eventually visiting more than eighty countries on five continents.

When I could no longer find a laboring job, I got into sales, knocking on doors, working on straight commission. I struggled from sale to sale until I began looking around me and asking, "Why is it that other people are doing better than I am?"

Then I did something that changed my life. I went and asked other successful people what they were doing. And they told me. And I did what they advised me to do, and my sales went up. Eventually, I became so successful that they made me a sales manager. As a sales manager, I used the same strategy. I found out what other successful managers were doing and then did it myself.

This process of learning and applying what I had learned changed my life. I am still amazed at how simple and obvious it is. Just find

out what other successful people do and do the same things until you get the same results. Wow! What an idea.

Simply put, some people are doing better than others because they do things differently and they do the right things right. Especially, they use their time far, far better than the average person.

Coming from an unsuccessful background, I had developed deep feelings of inferiority and inadequacy. I had fallen into the mental trap of assuming that people who were *doing* better than me *were* actually better than me. What I learned was that this was not necessarily true. They were just doing things *differently*, and what they had learned to do, within reason, I could learn as well.

This was a revelation to me. I was both amazed and excited with this discovery. I still am. I realized that I could change my life and achieve almost any goal I could set if I just found out what others were doing in that area and then did it myself until I got the same results they were getting.

Within one year of starting in sales, I was a top salesman. A year after I was made a manager, I was a vice-president in charge of a 95 person sales force in six countries. I was twenty-five years old.

Over the years, I have worked in twenty-two different jobs, started and built several companies, earned a business degree from a major university, learned to speak French, German and Spanish and been a speaker, trainer or consultant for more than 500 companies. I currently give talks and seminars to more than 250,000 people each year, with audiences as large as 20,000 people.

Throughout my career, I have found a simple truth. The ability to concentrate single-mindedly on your most important task, to do it well and to finish it completely, is the key to great success, achievement, respect, status and happiness in life. This key insight is the heart and soul of this book.

This book is written to show you how to get ahead more rapidly in your career. These pages contain the twenty-one most powerful principles on personal effectiveness I have ever discovered.

These methods, techniques and strategies are practical, proven and fast acting. In the interests of time, I do not dwell on the various psychological or emotional explanations for procrastination or poor time management. There are no lengthy departures into theory or research. What you will learn are specific actions you can take

immediately to get better, faster results in your work.

8

Every idea in this book is focused on increasing your overall levels of productivity, performance and output, on making you more valuable in whatever you do. You can apply many of these ideas to your personal life as well.

Each of these twenty-one methods and techniques is complete in itself. All are necessary. One strategy might be effective in one situation and another might apply to another task. All together, these twenty-one ideas represent a smorgasbord of personal effectiveness techniques that you can use at any time, in any order or sequence that makes sense to you at the moment.

The key to success is action. These principles work to bring about fast, predictable improvements in performance and results. The faster you learn and apply them, the faster you will move ahead in your career. Guaranteed.

There will be no limit to what you can accomplish when you learn how to “Eat That Frog!”

Brian Tracy

Introduction

This is a wonderful time to be alive. There have never been more possibilities and opportunities for you to achieve more of your goals than exist today. As perhaps never before in human history, you are actually drowning in options. In fact, there are so many good things that you can do that your ability to decide among them maybe the critical determinant of what you accomplish in life.

If you are like most people today, you are overwhelmed with too much to do and too little time. As you struggle to get caught up, new tasks and responsibilities just keep rolling in, like the tides. Because of this, **you will never be able to do everything you have to do.** You will never be caught up. You will always be behind in some of your tasks and responsibilities, and probably in many of them.

For this reason, and perhaps more than ever before, your ability to select your most important task at each moment, and then to get started on that task and to get it done both quickly and well, will probably have more of an impact on your success than any other quality or skill you can develop.

An average person who develops the habit of setting clear priorities and getting important tasks completed quickly will run circles

10
around a genius who talks a lot and makes wonderful plans but who gets very little done.

It has been said for many years that if the first thing you do each morning is to eat a live frog, you can go through the day with the satisfaction of knowing that that is probably the worst thing that is going to happen to you all day long.

Your "frog" is your biggest, most important task, the one you are most likely to procrastinate on if you don't do something about it. It is also the one task that can have the greatest positive impact on your life and results at the moment.

It is also been said that, "If you have to eat two frogs, eat the ugliest one first."

This is another way of saying that, if you have two important tasks before you, start with the biggest, hardest and most important task first. Discipline yourself to begin immediately and then to persist until the task is complete before you go on to something else.

Think of it as a “test.” Treat it like a personal challenge. Resist the temptation to start with the easier task. Continually remind yourself that one of the most important decisions you make each day is your

11

choice of what you will do immediately and what you will do later, if you do it at all.

There is one final observation. "If you have to eat a live frog, it doesn't pay to sit and look at it for very long."

The key to reaching high levels of performance and productivity is for you to develop the lifelong habit of tackling your major task first thing each morning. You must develop the routine of "Eating your frog" before you do anything else, and without taking too much time to think about it.

In study after study of men and women who get paid more and promoted faster, the quality of "action orientation," stands out as the most observable and consistent behavior they demonstrate in everything they do. Successful, effective people are those who launch directly into their major tasks and then discipline themselves to work steadily and single mindedly until those tasks are complete.

In our world, and especially in our business world, you are paid and promoted for getting specific, measurable results. You are paid for making a valuable contribution and especially, for making the contribution that is expected of you.

12

"Failure to execute" is one of the biggest problems in organizations today. Many people confuse activity with accomplishment. They talk continually, hold endless meetings and make wonderful plans, but, in the final analysis, no one does the job and gets the results required.

Fully 95% of your success in life and work will be determined by the kind of habits that you develop over time. The habit of setting priorities, overcoming procrastination and getting on with your most important task is a mental and physical skill. As such, this habit is learnable through practice and repetition, over and over again, until it locks into your subconscious mind and becomes a permanent part of your behavior. Once it becomes a habit, it becomes both automatic and easy to do.

You are designed mentally and emotionally in such a way that task completion gives you a positive feeling. It makes you happy. It makes you feel like a winner.

Whenever you complete a task, of any size or importance, you feel a surge of energy, enthusiasm and self-esteem. The more important the completed task, the happier, more confident and powerful you feel about yourself and your world.

Important task completion triggers the release of endorphins in your brain. These endorphins give you a natural "high." The endorphin

13

rush that follows successful completion of any task makes you feel more creative and confident.

Here is one of the most important of the so-called "secrets of success." It is that you can actually develop a "positive addiction" to endorphins and to the feeling of enhanced clarity, confidence and competence that they trigger. When you develop this "addiction," almost without thinking you begin to organize your life in such a way that you are continually starting and completing ever more important tasks and projects. You actually become addicted, in a very positive sense, to success and contribution.

One of the keys to your living a wonderful life, having a successful career and feeling terrific about yourself is for you to develop the habit of starting and finishing important jobs. At that point, this behavior takes on a power of its own and you find it easier to

complete important tasks than not to complete them.

You remember the story of the man who stops the musician on the street of New York and asks how he can get to Carnegie Hall. The musician replies, "Practice, man, practice."

Practice is the key to mastering any skill. Fortunately, your mind is like a muscle. It grows stronger and more capable with use. With

practice, you can learn any behavior or develop any habit that you consider either desirable or necessary.

14

You need three key qualities to develop the habits of focus and concentration. They are all learnable. They are decision, discipline and determination.

First, make a **decision** to develop the habit of task completion. Second, **discipline** yourself to practice the principles you are about to learn over and over until you master them. And finally, back everything you do with **determination** until the habit is locked in and becomes a permanent part of your personality.

There is a special way that you can accelerate your progress toward becoming the highly productive, effective, efficient person that you

want to be. It consists of your thinking continually about the rewards and benefits of being an action oriented, fast moving, focused person. See yourself as the kind of person who gets important jobs done quickly and well on a consistent basis.

Your mental picture of yourself has a powerful effect on your behavior. Visualize yourself as the person you intend to be in the future. Your self-image, the way you see yourself on the inside, largely determines your performance on the outside. As professional

15
speaker Jim Cathcart says, “The person you *see* is the person you will *be*.”

You have a virtually unlimited ability to learn and develop new skills, habits and abilities. When you train yourself, through repetition and practice, to overcome procrastination and get your most important tasks completed quickly, you will move yourself onto the fast track in your life and career and step on the accelerator.

Eat That Frog!

Chapter 1 - Set the Table

"There is one quality that one must possess to win, and that is definiteness of purpose, the knowledge of what one wants and a burning desire to achieve it." (Napoleon Hill)

Before you can determine your "frog" and get on with eating it, you have to decide exactly what it is you want to accomplish in each area of your life. **Clarity** is the most important concept in personal productivity. The number one reason why some people get more

work done faster is because they are absolutely clear about their goals and objectives and they don't deviate from them.

The more clear you are about what you want and what you have to do to achieve it, the easier it is for you to overcome procrastination, eat your frog and get on with the completion of the task.

A major reason for procrastination and lack of motivation is vagueness, confusion and fuzzy mindedness about what it is you are supposed to do, and in what order and for what reason. You must avoid this common condition with all your strength by striving for ever greater clarity in everything you do.

Here is a great rule for success: "Think on paper."

17

Only about 3% of adults have clear, written goals. These people accomplish five and ten times as much as people of equal or better education and ability but who, for whatever reason, have never taken the time to write out exactly what it is they want.

There is a powerful formula for setting and achieving goals that you can use for the rest of your life. It consists of seven simple steps. Any one of these steps can double and triple your productivity if you are not currently using it. Many of my graduates have increased their incomes dramatically in a matter of a few years, or even a few

months, with this simple, seven-part method.

Step number one: Decide exactly what you want.

Either decide for yourself or sit down with your boss and discuss your goals and objectives until you are absolutely, crystal clear about what is expected of you and in what order of priority. It is amazing how many people are working away, day after day, on low value tasks because they have not had this critical discussion with their manager.

Rule: "One of the very worst uses of time is to do something very well that need not be done at all."

18

Stephen Covey says that, "Before you begin scrambling up the ladder of success, make sure that it is leaning against the right building."

Step number two: Write it down.

Think on paper. When you write your goal down, you crystallize it and give it tangible form. You create something that you can touch and see. On the other hand, a goal or objective that is not in writing is merely a wish or a fantasy. It has no energy behind it. Unwritten goals lead to confusion, vagueness, misdirection and numerous mistakes.

Step number three: Set a deadline on your goal.

A goal or decision without a deadline has no urgency. It has no real beginning or end. Without a definite deadline accompanied by the assignment or acceptance of specific responsibilities for completion, you will naturally procrastinate and get very little done.

Step number four: Make a list of everything that you can think of that you are going to have to do to achieve your goal.

As you think of new activities, add them to your list. Keep building your list until it is complete. A list gives you a visual picture of the larger task or objective. It gives you a track to run on. It dramatically

increases the likelihood that you will achieve your goal as you have defined it and on schedule.

19

Step number five: Organize the list into a plan.

Organize your list by priority and sequence. Take a few minutes to decide what you need to do first and what you can do later. Decide what has to be done before something else and what needs to be done afterwards. Even better, lay out your plan visually, in the form of a series of boxes and circles on a sheet of paper. You'll be amazed

at how much easier it is to achieve your goal when you break it down into individual tasks.

With a written goal and an organized plan of action, you will be far more productive and efficient than someone who is carrying his goals around in his mind.

Step number six: Take action on your plan immediately.

Do something. Do anything. An average plan vigorously executed is far better than a brilliant plan on which nothing is done. For you to achieve any kind of success, execution is everything.

Step number seven: Resolve to do something every single day that moves you toward your major goal.

20

Build this activity into your daily schedule. Read a specific number of pages on a key subject. Call on a specific number of prospects or customers. Engage in a specific period of physical exercise. Learn a certain number of new words in a foreign language. Never miss a day.

Keep pushing forward. Once you start moving, keep moving. Don't stop. This decision, this discipline alone, can make you one of the most productive and successful people of your generation.

Clear written goals have a wonderful effect on your thinking. They motivate you and galvanize you into action. They stimulate your creativity, release your energy and help you to overcome procrastination as much as any other factor.

Goals are the fuel in the furnace of achievement. The bigger your goals and the clearer they are, the more excited you become about achieving them. The more you think about your goals, the greater becomes your inner drive and desire to accomplish them.

Think about your goals and review them daily. Every morning when you begin, take action on the most important task you can accomplish to achieve your most important goal at the moment.

21

Eat That Frog! Take a clean sheet of paper right now and make out a list of ten goals you want to accomplish in the next year. Write your goals as though a year has already passed and they are now a reality. Use the present tense, positive and personal case so that they are immediately accepted by your subconscious mind.

For example, you would write. "I earn X number of dollars per year." Or "I weigh X number of pounds." Or "I drive such and such

a car.”

Then, go back over your list of ten goals and select the one goal that, if you achieved it, would have the greatest positive impact on your life. Whatever that goal is, write it on a separate sheet of paper, set a deadline, make a plan, take action on your plan and then do something every single day that moves you toward that goal. This exercise alone could change your life!

Chapter 2 – Plan Every Day In Advance

“Planning is bringing the future into the present so you can do something about it now.” (Alan Lakein)

You have heard the old question, "How do you eat an elephant? One bite at a time!"

How do you eat your biggest, ugliest frog? The same way; you break it down into specific step-by-step activities and then you start on the first one.

Your mind, your ability to think, plan and decide, is your most powerful tool for overcoming procrastination and increasing your productivity. Your ability to set your goals, plan and take action on them determines the course of your life. The very act of thinking and planning unlocks your mental powers, triggers your creativity and increases your mental and physical energies.

Conversely, as Alex MacKenzie wrote, "*Action without planning is the cause of every failure.*"

Your ability to plan well, in advance of beginning, is a measure of your overall competence. The better the plan you have, the easier it is

for you to overcome procrastination, to get started , to eat your frog and then to keep going.

One of your top goals at work should be for you to get the highest possible return on your investment of mental, emotional and physical energy. The good news is that every minute spent in planning saves as many as ten minutes in execution. It only takes about ten or twelve minutes for you to plan out your day, but this small investment of time will save you at least two hours (100-120 minutes) in wasted time and diffused effort throughout the day.

You may have heard of the six "P" formula. It says, "Proper Prior Planning Prevents Poor Performance."

When you consider how helpful planning can be in increasing your productivity and performance, it is amazing how few people practice it every single day. And planning is really quite simple to do. All you need is a piece of paper and a pen. The most sophisticated Palm Pilot, computer program or time planner is based on the same principle. It is based on your sitting down and making a list of everything you have to do before you begin.

Always work from a list. When something new comes up, add it to the list before you do it. You can increase your productivity and

output by 25% or more from the first day that you begin working

consistently from a list.

Make out your list the night before, at the end of the workday. Move everything that you have not yet accomplished onto your list for the coming day and then add everything that you have to do the next day. When you make out your list the evening or the night before, your subconscious mind works on your list all night long while you sleep. Often you will wake up with great ideas and insights that you can use to get your job done faster and better than you had initially thought.

The more time you take to make written lists of everything you have to do, in advance, the more effective and efficient you will be.

There are different lists that you need for different purposes. First, you should create a **master list** on which you write down everything you can think of that you want to do some time in the future. This is the place where you capture every idea that comes to or every new task or responsibility that comes up. You can then sort out the items later.

Second, you should have a **monthly list** that you make up at the end of the month for the month ahead. This may contain items transferred from your master list.

Third, you should have a **weekly list** where you plan your entire week in advance. This is a list that is under construction as you go through the current week.

This discipline of systematic time planning can be very helpful to you. Many people have told me that the habit of taking a couple of hours at the end of each week to plan the coming week has increased their productivity dramatically and changed their lives completely. This technique will work for you as well.

Finally, you transfer items from your monthly and weekly lists onto your **daily list**. These are the specific activities that you are going to accomplish that day.

As you work through the day, tick off the items on your list as you complete them. This activity gives you a visual picture of accomplishment. It generates a feeling of success and forward motion. Seeing yourself working progressively through your list motivates and energizes you. It raises your self-esteem and self respect. Steady, visible progress propels you forward and helps you to overcome procrastination.

When you have a project of any kind, begin by making a list of every step that you will have to complete to finish the project from

beginning to end. Organize the project by priority and sequence. Lay it out in front of you on paper or on a computer so that you can see it. Then go to work on one task at a time. You will be amazed at how much you get done in this way.

As you work through your lists, you will feel more and more effective and powerful. You will feel more in control of your life. You will be naturally motivated to do even more. You will think better and more creatively and you will get more and better insights that enable you to do your work even faster.

As you work steadily through your lists, you will develop a sense of positive forward momentum that enables you to overcome procrastination. This feeling of progress gives you more energy and keeps you going throughout the day.

One of the most important rules of personal effectiveness is the **10/90 Rule**. This rule says that the first 10% of time that you spend planning and organizing your work, before you begin, will save you as much as 90% of the time in getting the job done once you get started. You only have to try this rule once to prove it to yourself.

When you plan each day in advance, you find it much easier to get going and to keep going. The work goes faster and smoother than

ever before. You feel more powerful and competent. You eventually become *unstoppable*.

Eat That Frog! Begin today to plan every day, week and month in advance. Take a notepad or sheet of paper and make a list of everything you have to do in the next 24 hours. Add to it as new items come up. Make a list of all your projects, the big multi-task jobs that are important to your future.

Lay out each of your major goals, projects or tasks by **priority**, what is most important, and by **sequence**, what has to be done first, what comes second and so forth. Start with the end in mind and work backward.

Think on paper! Always work from a list. You'll be amazed at how much more productive you become, and how much easier it is to eat your frog.

Chapter 3 - Apply the 80/20 Rule to Everything

"We always have time enough, if we will but use it aright." (Wolfgang Von Goethe)

The 80/20 Rule is one of the most helpful of all concepts of time and life management. It is also called the Pareto Principle after its founder, the Italian economist Vilfredo Pareto, who first wrote about it in 1895. Pareto noticed that people in his society seemed to divide naturally into what he called the "vital few," the top 20% in terms of money and influence, and the "trivial many," the bottom 80%.

He later discovered that virtually all economic activity was subject to this Pareto Principle as well.

For example, this rule says that 20% of your activities will account for 80% of your results. 20% of your customers will account for 80% of your sales. 20% of your products or services will account for 80% of your profits. 20% of your tasks will account for 80% of the value of what you do, and so on.

This means that if you have a list of ten items to do, two of those items will turn out to be worth as much or more than the other eight items put together.

Here is an interesting discovery. Each of these tasks may take the same amount of time to accomplish. But one or two of those tasks will contribute five or ten times the value as any of the others.

Often, one item on a list of ten things that you have to do can be worth more than all the other *nine* items put together. This task is invariably the frog that you should eat first.

Can you guess on which items the average person is most likely to procrastinate? The sad fact is that most people procrastinate on the top ten or twenty percent of items that are the most valuable and important, the “vital few.” They busy themselves instead with the least important 80%, the "trivial many" that contribute very little to results.

You often see people who appear to be busy all day long but they seem to accomplish very little. This is almost always because they are busy doing things that are of low value while they procrastinate on the one or two activities that could make a real difference to their companies and to their careers.

The most valuable tasks you can do each day are often the hardest and most complex. But the payoff and rewards for completing these tasks efficiently can be tremendous. For this reason, you must

30

adamantly refuse to work on tasks in the bottom 80% while you still have tasks in the top 20% left to be done.

Before you begin work, always ask yourself, “Is this task in the top 20% of my activities or in the bottom 80%?”

Rule: “Resist the temptation to clear up small things first.”

Remember, whatever you *choose* to do, over and over, eventually becomes a habit that is hard to break. If you choose to start your day on low value tasks, you soon develop the habit of always starting and working on low value tasks. This is not the kind of habit you want to develop, or keep.

The hardest part of any important task is getting started on it in the first place. Once you actually begin work on a valuable task, you seem to be naturally motivated to continue. There is a part of your mind that loves to be busy working on significant tasks that can really make a difference. Your job is to feed this part of your mind continually.

Just *thinking* about starting and finishing an important task motivates you and helps you to overcome procrastination. The fact is that the amount of time required to complete an important job is often the same as the time required to do an unimportant job. The difference is

that you get a tremendous feeling of pride and satisfaction from the completion of something valuable and significant. However, when

you complete a low value task, using the same amount of time and energy, you get little or no satisfaction at all.

Time management is really **life** management, **personal** management. It is really taking control over the **sequence of events**. Time management is control over what you do next. And you are always free to choose the task that you will do next. Your ability to choose between the important and the unimportant is the key determinant of your success in life and work.

Effective, productive people discipline themselves to start on the most important task that is before them. They force themselves to eat that frog, whatever it is. As a result, they accomplish vastly more than the average person and are much happier as a result. This should be your way of working as well.

Eat That Frog! Make a list of all the key goals, activities, projects and responsibilities in your life today. Which of them are, or could be, in the top 10% or 20% of tasks that represent, or could represent, 80% or 90% of your results?

Resolve today that you are going to spend more and more of your time working in those few areas that can really make a difference in your life and career, and less and less time on lower value activities.

Chapter 4 – Consider the Consequences

“Every man has become great, every successful man has succeeded, in proportion as he has confined his powers to one particular channel.”
(Orison Swett Marden)

The mark of the superior thinker is his or her ability to accurately predict the consequences of doing or not doing something. The potential consequences of any task or activity are the key determinants of how important it really is to you and to your company. This way of evaluating the significance of a task is how you determine what your next frog really is.

Doctor Edward Banfield of Harvard University, after more than 50 years of research, concluded that "long-time perspective" is the most accurate single predictor of upward social and economic mobility in America. Long time perspective turns out to be more important than family background, education, race, intelligence, connections or virtually any other single factor in determining your success in life

and at work.

Your attitude toward time, your "time horizon," has an enormous impact on your behavior and your choices. People who take the long view of their lives and careers always seem to make much better

34

decisions about their time and activities than people who give very little thought to the future.

Rule: "Long-term thinking improves short-term decision making."

Successful people have a clear future orientation. They think five, ten and twenty years out into the future. They analyze their choices and behaviors in the present to make sure that they are consistent with the long-term future that they desire.

In your work, having a clear idea of what is really important to you in the long-term makes it much easier for you to make better decisions about your priorities in the short-term.

By definition, something that is important has long-term potential consequences. Something that is unimportant has few or no long term potential consequences. Before starting on anything, you should always ask yourself, "*What are the potential consequences of doing or not doing this task?*"

Rule: "Future intent influences and often determines present actions."

The clearer you are about your future intentions, the greater influence that clarity will have on what you do in the moment. With a

35
clear long-term vision, you are much more capable of evaluating an activity in the present and to assure that it is consistent with where you truly want to end up.

Successful people are those who are willing to delay gratification and make sacrifices in the short term so that they can enjoy far greater rewards in the long term. Unsuccessful people, on the other hand, think more about short-term pleasure and immediate gratification while giving little thought to the long-term future.

Dennis Waitley, the motivational speaker, says, "Failures do what is *tension relieving* while winners do what is *goal achieving*."

For example, coming in to work earlier, reading regularly in your field, taking courses to improve your skills, and focusing on high value tasks in your work will all combine to have an enormous positive impact on your future.

On the other hand, coming in to work at the last moment, reading the

newspaper, drinking coffee and socializing with your coworkers may seem fun and enjoyable in the short-term but it inevitably leads to lack of promotion, underachievement and frustration in the long term.

36

If there is a task or activity with large potential positive consequences, make it a top priority and get started on it immediately. If there is something that can have large potential negative consequences if it is not done quickly and well, that becomes a top priority as well. Whatever your frog is, resolve to gulp it down first thing.

Motivation requires *motive*. The greater the positive potential impact that an action or behavior of yours can have on your life, once you define it clearly, the more motivated you will be to overcome procrastination and get it done quickly.

Keep yourself focused and forward moving by continually starting and completing those tasks that can make a major difference to your company and to your future.

The time is going to pass anyway. The only question is how you use and where you are going to end up at the end of the weeks and

months. And where you end up is largely a matter of the amount of consideration you give to the likely consequences of your actions in the short term.

Thinking continually about the potential consequences of your choices, decisions and behaviors is one of the very best ways to determine your true priorities in your work and personal life.

37

Eat That Frog! Review your list of tasks, activities and projects regularly. Continually ask yourself, “Which one project or activity, if I did it in an excellent and timely fashion, would have the greatest positive impact on my life?”

Whatever it is that can help you the most, set it as a goal, make a plan to achieve it and go to work on your plan immediately.

Remember the wonderful words of Goethe, *“Just begin and the mind grows heated; continue, and the task will be completed!”*

38

Chapter 5 - Practice the ABCDE Method Continually

“The first law of success is concentration – to bend all the energies to one point, and to go directly to that point, looking neither to the right or to the left.” (William Mathews)

The more thought you invest in planning and setting priorities before you begin, the more important things you will do and the faster you will get them done once you get started.

The more important and valuable the task is to you, the more you will be motivated to overcome procrastination and launch yourself into the job.

The ABCDE Method is a powerful priority setting technique that you can use every single day. This technique is so simple and effective that it can, all by itself, make you one of the most efficient and effective people in your field.

The power of this technique lies in its simplicity. Here's how it works: You start with a list of everything you have to do for the coming day. Think on paper.

You then place an A, B, C, D or E before each item on your list before you begin the first task.

39

An "A" item is defined as something that is very important. This is something that you *must* do. This is a task for which there can be serious consequences if you do it or fail to do it, like visiting a key customer or finishing a report for your boss that she needs for an

upcoming board meeting. These are the frogs of your life.

If you have more than one "A" task, you prioritize these tasks by writing A-1, A-2, A-3, and so on in front of each item. Your A-1 task is your biggest, ugliest frog of all.

A "B" item is defined as a task that you *should* do. But it only has mild consequences. These are the tadpoles of your work life. This means that someone may be unhappy or inconvenienced if you don't do it, but it is nowhere as important as an "A" task. Returning an unimportant telephone message or reviewing your email would be a "B" task.

The rule is that you should never do a "B" task when there is an "A" task left undone. You should never be distracted by a tadpole when there is a big frog sitting there waiting to be eaten.

A "C" task is defined as something that would be *nice* to do, but for which there are no consequences at all, whether you do it or not. "C" tasks include phoning a friend, having coffee or lunch with a

coworker or completing some personal business during work hours. This sort of activity has no affect at all on your work life.

A "D" task is defined as something you can *delegate* to someone else.

The rule is that you should delegate everything that anyone else can do so that you can free up more time for the "A" tasks that only you can do.

An "E" task is defined as something that you can *eliminate* altogether and it won't make any real difference.

This may be a task that was important at one time but which is no longer relevant to yourself or anyone else. Often it is something you continue to do out of habit or because you enjoy it.

After you have applied the ABCDE Method to your list, you will now be completely organized and ready to get more important things done faster.

The key to making this ABCDE Method work is for you to now discipline yourself to start immediately on your "A-1" task and then stay at it until it is complete. Use your willpower to get going and stay going on this one job, the most important single task you could possibly be doing. Eat the whole frog and don't stop until its finished completely.

41

Your ability to think through, analyze your work list and determine your "A-1" task is the springboard to higher levels of accomplishment, and greater self-esteem, self-respect and personal

pride.

When you develop the habit of concentrating on your "A-1," most important activity, on eating your frog, you will start getting more done than any two or three people around you.

Eat That Frog! Review your work list right now and put an A, B, C, D or E next to each task or activity. Select your A-1 job or project and begin on it immediately. Discipline yourself to do nothing else until this one job is complete.

Practice this ABCDE Method every day and on every work or project list, before you begin work, for the next month. By that time, you will have developed the habit of setting and working on your highest priority tasks and your future will be assured!

Chapter 6 - Focus On Key Result Areas

"When every physical and mental resource is focused, one's power to solve a problem multiplies tremendously." (Norman Vincent Peale)

Why are you on the payroll? This is one of the most important questions you ever ask and answer, over and over again, throughout your career.

As it happens, most people are not sure exactly **why** they are on the payroll. But if you are not crystal clear about why it is that you are on the payroll and what results you have been hired to accomplish, it is very hard for you to perform at your best and get paid more and promoted faster.

In its simplest terms, you have been hired to get specific **results**. A wage or a salary is a payment for a specific quality and quantity of work that can be combined with the work of others to create a product or service that customers are willing to pay for.

Each job can be broken down into about five to seven key result areas, seldom more. These are the results that you absolutely, positively have to get to fulfill your responsibilities and make your maximum contribution to your organization.

43

Key result areas are similar to the vital functions of the body, such as blood pressure, heart rate, respiratory rate and brainwave activity. An absence of any one of these vital functions leads to the death of the organism. By the same token, your failure to perform in a critical result area of your work can lead to the end of your job as well.

For example, the key result areas of management are: Planning,

Organizing, Staffing, Delegating, Supervising, Measuring and Reporting. These are the results that a manager must get to succeed in his or her area of responsibility.

There is essential knowledge and skill that you must have for your job. These demands are constantly changing. There are core competencies that you have developed that make it possible for you to do your job in the first place. But there are always key results that are central to your work and which determine your success or failure in your job.

A key result area is defined as something for which you are completely responsible. This means that if you don't do it, it doesn't get done. A key result area is an activity that is under your control. It is an output of your work that becomes an input or a contributing factor to the work of others.

44

The starting point of high performance is for you to first of all identify the key result areas of your work. Discuss them with your boss. Make a list of your output responsibilities and make sure that the people above you, next to you and below you are in agreement with it.

For example, for a salesperson, prospecting and opening new accounts is a key result area. This activity is the key to the entire sales process. Closing a sale is a key result area. When the sale is made, it triggers the activities of many other people to produce and deliver the product or service.

For a company owner or key executive, negotiating a bank loan is a key result area. Hiring the right people and delegating effectively are both key result areas. For a receptionist or secretary, typing a letter or answering the phone and transferring the caller quickly and efficiently are defined as key result areas. A person's ability to perform these tasks quickly and well largely determines their pay and promotability.

Once you have determined your key result areas, the second step is for you to grade yourself on a scale of 1-10 in each of those areas. Where are you strong and where are you weak? Where are you getting excellent results and where are you underperforming?

Here's the rule: Your **weakest** key result area sets the height at which you can use all your other skills and abilities.

This rule says that you could be exceptional in six out of seven key result areas but really poor in the seventh. And your poor performance in the seventh area will hold you back and determine how much you achieve with all your other skills. This weakness will act as a drag on your effectiveness and be a constant source of friction and frustration.

For example, delegating is a key result area for a manager. This skill is the key leverage point that enables a manager to manage, to get results through others. A manager who cannot delegate properly is held back from using all his or her other skills at their maximum level of effectiveness. Poor delegation skills alone can lead to failure in the job.

One of the major reasons for procrastination and delay in the workplace is that people avoid jobs and activities in those areas where they have performed poorly in the past. Instead of setting a goal and making a plan to improve in a particular area, most people avoid that area altogether, which just makes the situation worse.

The reverse of this is that, the *better* you become in a particular skill area, the more motivated you will be to perform that function, the

less you will procrastinate and the more determined you will be to get it finished.

The fact is that everybody has both strengths and weaknesses. Refuse to rationalize, justify or defend your areas of weakness. Instead, identify them clearly. Set a goal and make a plan to become very good in each of those areas. Just think! You may be only one critical skill away from top performance at your job.

Here is one of the greatest questions you will ever ask and answer:
"What one skill, if I developed and did it in an excellent fashion, would have the greatest positive impact on my career?"

You should use this question to guide your career for the rest of your life. Look into yourself for the answer. You usually know what it is.

Ask your boss this question. Ask your coworkers. Ask your friends and your family. Whatever it is, find out and then go to work to bring up your performance in this area.

The good news is that all business skills are *learnable*. If anyone else is excellent in that particular key result area, this is proof that you can become excellent as well, if you decide to.

things done faster is for you to become absolutely excellent in your key result areas. This can be as important as anything else you do in your life or your career.

Eat That Frog! Identify the key result areas of your work. What are they? Write down the key results you have to get to do your job in an excellent fashion. Give yourself a grade from 1-10 on each one. And then determine the one key skill that, if you did it in an excellent manner, would help you the most in your work.

Take this list to your boss and discuss it with him or her. Invite honest feedback and appraisal. You can only get better when you are open to the constructive inputs of other people. Discuss your results with your staff and coworkers. Talk them over with your spouse.

Make a habit of doing this analysis regularly for the rest of your career. Never stop improving. This decision alone can change your life.

Chapter 7 – Obey the Law of Forced Efficiency

“Concentration, in its truest, unadulterated form, means the ability to focus the mind on one single solitary thing.” (Komar)

This law says that, "There is never enough time to do everything, but there is always enough time to do the most important thing."

Put another way, you cannot eat every tadpole and frog in the pond, but you can eat the biggest and ugliest one, and that will be enough, at least for the time being.

When you run out of time and the consequences for non-completion of a key task or project can be really serious, you always seem to find the time to get it done, often at the very last minute. You start early, you stay late and you drive yourself to complete the job rather than to face the negative consequences that would follow if you didn't get it completed within the time limit.

Rule: "There will never be enough time to do everything you have to do."

The fact is that the average person today is working at 110% to 130% of capacity. And the jobs and responsibilities just keep piling up. Everyone has stacks of reading material they still have to go through.

49

One study concluded recently that the average executive has 300-400 hours of reading and projects backlogged at home and at the office. What this means is that you will **never** be caught up. Get that out of

your mind. All you can hope for is to be on top of your most important responsibilities. The others will just have to wait.

Many people say that they work better under the pressure of deadlines. Unfortunately, years of research indicate that this is seldom true.

Under the pressure of deadlines, often self-created through procrastination and delay, people suffer greater stress, make more mistakes, and have to do redo more tasks, than under any other conditions. Often the mistakes that are made when people are working under tight deadlines lead to defects and cost overruns that lead to substantial financial losses in the long-term. Sometimes the job actually takes much longer to complete when people rush to get the job done at the last minute and then have to redo it.

There are three questions that you can use on a regular basis to keep yourself focused on getting your most important tasks completed on schedule. The first question is "*What are my highest value activities?*"

Put another way, what are the biggest frogs that you have to eat to make the greatest contribution to your organization? To your family?

To your life in general?

This is one of the most important questions you can ask and answer. What are your highest value activities? First, think this through for yourself. Then, ask your boss. Ask your coworkers and subordinates. Ask your friends and family. Like focusing the lens of a camera, you must be crystal clear about your highest value activities before you begin work.

The second question you can ask continually is, "*What can I and only I do, that if done well, will make a real difference?*"

This question comes from Peter Drucker, the management guru. It is one of the best of all questions for achieving personal effectiveness. What can you, and only you do, that if done well, can make a real difference?

This is something that only you can do. If you don't do it, it won't be done by someone else. But if you do do it, and you do it well, it can really make a difference to your life and your career. What is your frog in your work?

will be a specific answer. Your job is to be clear about the answer and then to start and work on this task before anything else.

The third question you can ask is "*What is the most valuable use of my time, right now?*"

What is my biggest frog of all at this moment?

This is the core question of time management. This is the key to overcoming procrastination and becoming a highly productive person. Every hour of every day, there is an answer to this question. Your job is to ask yourself the question, over and over again, and to always be working on the answer to it, whatever it is.

Do first things first and second things not at all. As Goethe said, "*The things that matter most must never be at the mercy of the things that matter least.*"

The more accurate your answers to these questions, the easier it will be for you to set clear priorities, to overcome procrastination and to get started on that one activity that represents the most valuable use of your time.

Eat That Frog! Your most powerful thinking tool for success is your ability to discriminate between one priority and another. Take a few minutes each day and sit quietly where you cannot be disturbed. During this time, let your mind relax and just think about your work and activities, without stress or pressure.

In almost every case, during this time of solitude, you will receive wonderful insights and ideas that will save you enormous amounts of time when you apply them back on the job. Often you will experience breakthroughs that will change the direction of your life and work.

Chapter 8 - Prepare Thoroughly Before You Begin

"No matter what the level of your ability, you have more potential than you can ever develop in a lifetime." (James T. McKay)

One of the best ways for you to overcome procrastination and get more things done faster is for you to have everything you need at hand before you begin. When you are fully prepared, you are like a cocked gun or an archer with an arrow pulled back taut in the bow. You just need one small mental push to get started on your highest value tasks.

This is like getting everything ready to prepare a complete meal, such as eating a big frog. You get all the ingredients out on the counter in front of you and then begin putting the dinner together, one step at a time.

Begin by clearing off your desk or workspace so that you only have one task in front of you. If necessary, put everything on the floor or on the table behind you. Gather all the information, reports, details, papers, and work materials that you will require to complete the job. Have them at hand so you can reach them without getting up or moving.

54

Be sure that you have all writing materials, computer disks, access codes, email addresses and everything else you need to start and continue working until the job is done.

Set up your work area so that it is comfortable, attractive and conducive to working for long periods. Especially, make sure that you have a comfortable chair that supports your back and allows your feet to sit flat on the floor.

The most productive people take the time to create a work area

where they enjoy spending time. The cleaner and neater your work area before you begin, the easier it is for you to get started and keep going.

One of the great techniques for overcoming procrastination (eating frogs) is for you to get everything completely ready to work in advance. When everything is laid out in order and sequence, you feel much more like getting on with the job.

It is amazing how many books never get written, how many degrees never get completed, how many life changing tasks never get started because people fail to take the first step of preparing everything in advance.

55

Los Angeles attracts people from all over America who dream of writing a successful movie script and selling it to one of the studios. They move to Los Angeles and work at low level jobs for years while they dream of writing and selling a popular script.

Recently, the *Los Angeles Times* sent a reporter out onto Wilshire Boulevard to interview passers by. When people came along, he asked them one question: "How is your script coming?" Three out of four passersby replied, "Almost done!"

The sad fact is that "almost done" probably meant "not yet started."
Don't let this happen to you.

When you sit down, with everything in front of you, ready to go, assume the body language of high performance. Sit up straight, sit forward and away from the back of the chair. Carry yourself as though you were an efficient, effective high performing personality. Then, pick up the first item and say to yourself, "Let's get to work!" and plunge in. And once you've started, keep going until the job is finished.

Eat That Frog! Take a good look at your desk or office, both at home and at the office. Ask yourself, "What kind of a person works in an environment like that?"

56

The cleaner and neater your work environment, the more positive, productive and confident you feel. Resolve today to clean up your desk and office completely so that you feel effective, efficient and ready to get going each time you sit down to work.

57

"The only certain means of success is to render more and better service than is expected of you, no matter what your task may be."

(Og Mandino)

This is one of the most important personal productivity principles of all. Learn what you need to learn so that you can do your work in an excellent fashion. The better you become at eating a particular type of frog, the more likely you are to just plunge in and get it done.

A major reason for delay and procrastination is a feeling of inadequacy, lack of confidence or inability in a key area of the task. A single area where you feel weak or deficient is enough to discourage you from starting the job at all.

Continually upgrade your skills in your key result areas. Remember, however good you are today, your knowledge and skill is becoming obsolete at a rapid rate. As Pat Riley, the basketball coach said, "If you're not getting better, you're getting worse."

One of the most helpful of all time management techniques is for you to get *better* at your key tasks. Personal and professional improvement is one of the best time savers there is. The better you are at a key task, the more motivated you are to launch into it. The

better you are, the more energy and enthusiasm you have. When you know that you can do a job well, you find it easier to overcome procrastination and get the job done faster and better than under any other circumstances.

One piece of information or one additional skill can make an enormous difference in your ability to do the job well. Identify the most important things you do and then make a plan to continually upgrade your skills in those areas.

Rule: “Continuous learning is the minimum requirement for success in any field.”

Refuse to allow a weakness or a lack of ability in any area to hold you back. Everything is learnable. And what others have learned, you can learn as well.

When I began to write my first book, I was discouraged because I could only use the “hunt and peck” method of typing. I soon realized that I had to learn to touch-type if I was ever going to write and rewrite a 300-page book. So I bought a touch-typing program for my computer and practiced for 20 to 30 minutes every day for three months. By the end of that time, I was typing 40-50 words per minute. With this skill, I have been able to write a dozen books that have now been published all over the world.

The best news is that you can learn whatever skills you need to be more productive and more effective. You can become a touch typist if necessary. You can become an expert with a computer. You can become a terrific negotiator or a super salesperson. You can learn to speak in public. You can learn to write effectively and well. These are all skills you can acquire, as soon as you decide to and make them a priority.

Read in your field for at least one hour every day. Get up a little earlier in the morning and read for 30-60 minutes in a book or magazine that contains information that can help you to be more effective and productive at what you do.

Take every course and seminar available on key skills that can help you. Attend the conventions and business meetings of your profession or occupation. Go to the sessions and workshops. Sit up front and take notes. Purchase the audio recordings of the programs. Dedicate yourself to becoming one of the most knowledgeable and competent people in your field.

Finally, listen to audio programs in your car. The average car owner sits behind the wheel 500-1000 hours each year while driving from place to place. Turn driving time into learning time. You can become one of the smartest, most capable and highest paid people in your

field simply by listening to educational audio programs as you drive around.

The more you learn and know, the more confident and motivated you feel. You better you become, the more capable you will be of doing even more in your field.

The more you learn, the more you can learn. Just as you can build your physical muscles through physical exercise, you build your mental muscles with mental exercises. And there is no limit to how far or how fast you can advance except for the limits you place on your own imagination.

Eat That Frog! Resolve today to become a “Do-It-To-Yourself” project. Become a lifelong student of your craft. School is never out for the professional.

What are the key skills that can help you the most to achieve better and faster results? What are the core competencies that you will need to have in the future to lead your field? Whatever they are, set a goal, make a plan and begin developing and increasing your ability in those areas. Resolve to be the very best at what you do!

"Do your work. Not just your work and no more, but a little more for the lavishings sake – that little more that is worth all the rest." (Dean Briggs)

You are remarkable! You have special talents and abilities that make you different from every other person who has ever lived. There are frogs you can eat, or learn to eat, that can make you one of the most important people of your generation.

There are certain things that you can do, or that you can learn to do, that can make you extraordinarily valuable to yourself and to others. Your job is to identify your special areas of uniqueness and then to commit yourself to becoming very, very good in those areas.

Your most valuable asset, in terms of cash flow, is your "earning ability." Your ability to work enables you to bring tens of thousands of dollars into your life every year by simply applying your knowledge and skills to your world. This is your ability to eat specific frogs faster and better than others.

You could lose everything you own - your house, your car, your job, your bank account- but as long as you still had your earning ability, you could make it all back and more besides.

Take stock of your unique talents and abilities on a regular basis. What is it that you do especially well? What are you good at? What do you do easily and well that is difficult for other people? Looking back at your career, what has been most responsible for your success in life and work to date? What have been the most significant frogs you have eaten in the past?

You are designed in such a way that you will most enjoy doing the very things that you have the ability to be the very best at. What is it that you enjoy the most about your work? What kind of frogs do you most enjoy eating? The very fact that you enjoy something means that you probably have within yourself the capability to be excellent in that area.

One of your great responsibilities in life is for you to decide what it is that you really love to do and then to throw your whole heart into doing that special thing very, very well.

Look at the various things you do. What is it that you do that gets you the most compliments and praise from other people? What do you do that positively affects the work and performance of other people more than anyone else?

Successful people are invariably those who have taken the time to identify what they do well and most enjoy. They know what they do that really makes a difference in their work, and they then concentrate on that task or area of activity exclusively.

You should always focus your best energies and abilities on starting and completing those key tasks where your unique talents and abilities enable you to do it well and make a significant contribution. You cannot do everything but you can do those few things in which you excel, the few things that can really make a difference.

Eat That Frog! Continually ask yourself these key questions:

“What am I really good at? What do I enjoy the most about my work? What has been most responsible for my success in the past? If I could do any job at all, what job would it be?”

If you won the lottery or came into an enormous amount of money, and you could choose any job or any part of a job to do for the indefinite future, what work would you choose? What sort of preparation would you have to engage in to be able to do that work in an excellent fashion? Whatever your answer, get started today.

“Concentrate all your thoughts on the task at hand. The sun’s rays do not burn until brought to a focus.”

(Alexander Graham Bell)

What is holding you back? What sets the speed at which you achieve your goals? What determines how fast you move from where you are to where you want to go? What stops you or holds you back from eating the frogs that can really make a difference? Why aren’t you at your goal already?

These are some of the most important questions you will ever ask and answer achieving high levels of personal productivity and effectiveness. Whatever you have to do, there is always a **limiting factor** that determines how quickly and well you get it done. Your job is to study the task and identify the limiting factor or constraint within it. You must then focus all of your energies on alleviating that single chokepoint.

In virtually every task, large or small, there is a factor that sets the speed at which you achieve the goal or complete the job. What is it? Concentrate your mental energies on that one key area. This can be the most valuable use of your time and talents.

This may be a person whose help or decision you need, a resource that you require, a weakness in some part of the organization or something else. But it the limiting factor always there and it is always your job to find it.

For example, the purpose of a business is to create and keep a customer. By doing this in sufficient quantities, the company makes a profit and continues to grow and flourish.

In every business there is a limiting factor or chokepoint that determines how quickly and well the company achieves this purpose. It may be the marketing, the level of sales or the sales force itself. It may be the costs of operation or the methods of production. It may be the level of cash flow or costs. The success of the company may be determined by the competition, the customers or the current marketplace. One of these factors, more than anything else, determines how quickly the company achieves its goals of growth and profitability. What is it?

The accurate identification of the limiting factor in any process and the focus on that factor can usually bring about more progress in a shorter period of time than any other single activity.

The 80/20 Rule applies to the constraints in your life and in your work. What this means is that 80% of the constraints, the factors that

are holding you back from achieving your goals, are **internal**. They are within yourself, within your own personal qualities, abilities, habits, disciplines or competencies.

Only 20% of the limiting factors are external to you or to your organization.

Your key constraint can be something small and not particularly obvious. Sometimes it requires that you make a list of every step in the process and examine every activity to determine exactly what it is that is holding you back. Sometimes, it can be a single negative perception or objection on the part of the customers that is slowing down the entire sales process. Sometimes it is the absence of a single feature that is holding back the growth of sales of a product or service line.

Look into your company honestly. Look within your boss, your coworkers and members of your staff to see if there is a key weakness that is holding you or the company back, that is acting as a brake on the achievement of your key goals.

In your own life, you must have the honesty to look deeply into yourself for the limiting factor or limiting skill that sets the speed at which you achieve your personal goals.

Successful people always begin the analysis of constraints by asking the question, "What is it *in me* that is holding me back?" They accept complete responsibility and look to themselves for both the cause and cure of their problems.

Keep asking, "What sets the speed at which I get the results I want?"

The definition of the constraint determines the strategy that you use to alleviate it. The failure to identify the correct constraint, or the identification of the wrong constraint, can lead you off in the wrong direction. You can end up solving the wrong problem.

A major corporation, a client of mine, was experiencing declining sales. They concluded that the major constraint was the sales force and sales management. They spent an enormous amount of money reorganizing the management and retraining the salespeople.

They later found that the primary reason that their sales were down was a mistake made by an accountant that had accidentally priced their products too high relative to their competition in the marketplace. Once they revamped their pricing, their sales went back up and they returned to profitability.

Behind every constraint or chokepoint, once it is located and alleviated successfully, you will find another constraint or limiting

68

factor. Whether it is getting to work on time in the morning, or building a successful career, there are always limiting factors and bottlenecks that set the speed of your progress. Your job is to find them and to focus your energies on alleviating them as quickly as possible.

Often, starting off your day with the removal of a key bottleneck or constraint fills you full of energy and personal power. It propels you into following through and completing the job. And there is always something. Often a key constraint or limiting factor is the most important frog you could eat at that moment.

Eat That Frog! Identify your most important goal in life today. What is it? What one goal, if you achieved it, would have the greatest positive effect on your life? What one career accomplishment would have the greatest positive impact on your worklife?

Once you are clear about your major goal, ask yourself, "What sets the speed at which I accomplish this goal? Why don't I have it already? What is it in me that is holding me back?" Whatever your answers, take action immediately. Do something. Do

anything, but get started.

69

Chapter 12- Take It One Oil Barrel at A Time

"Persons with comparatively moderate powers will accomplish much if they apply themselves wholly and indefatigably to one thing at a time." (Samuel Smiles)

There is an old saying that, "By the yard it's hard; but inch by inch, anything's a cinch!"

One of the best ways to overcome procrastination is for you to get your mind off the huge task in front of you and focus on a single action that you can take. One of the best ways to eat a large frog is for you to take it one bite at a time.

Confucius wrote that, "A journey of a thousand leagues begins with a single step." This is a great strategy for overcoming procrastination and getting more things done faster.

Many years ago I crossed the heart of the Sahara Desert, the Tenezrouft, deep in modern day Algeria. By that time, the desert had been abandoned by the French for years and the original refueling stations were empty and shuttered.

The desert was 500 miles across in a single stretch, without water, food, a blade of grass or even a fly. It was totally flat, like a broad yellow, sand parking lot that stretched to the horizon in all directions.

More than 1300 people had perished in the crossing of that stretch of the Sahara in previous years. Often drifting sands had obliterated the track across the desert and the travelers had gotten lost in the night.

To counter this lack of features in the terrain, the French had marked the track with black, 55 gallon oil drums, five kilometers apart, at exactly the curvature of the earth as you crossed that flat wasteland.

Because of this, wherever you were in the daytime, you could see two oil barrels, the one you had just passed and the one five kilometers ahead. And that was enough.

All you had to do was to steer for the next oil barrel. As a result, we were able to cross the biggest desert in the world by simply taking it "one oil barrel at a time."

In the same way, you can accomplish the biggest task in your life by disciplining yourself to take it just one step at a time. Your job is to go

as far as you can see. You will then see far enough to go further.

71

To accomplish a great task, you must step out in faith and have complete confidence that your next step will soon become clear to you. Remember the wonderful advice, "Leap — and the net will appear!"

A great life, a great career is built by performing one task at a time, quickly and well. And then going on to the next task.

Financial independence is achieved by saving a little money every single month, year after year. Health and fitness are accomplished by just eating a little less and exercising a little more, day after day and month after month.

You can overcome procrastination and accomplish extraordinary things by just taking the first step, by getting started toward your goal and by then taking it one step, one oil barrel at a time.

Eat That Frog! Select any goal, task or project in your life where you have been procrastinating and take just one step toward accomplishing it immediately. Sometimes, all you need to do to get started is to sit down and make a list of all the steps you will need to take to eventually complete the task.

Then, just start and complete one item on the list. And then one more, and so on. You will be amazed at what you eventually accomplish.

Chapter 13 - Put the Pressure on Yourself

"The first requisite for success is to apply your physical and mental energies to one problem incessantly without growing weary."

(Thomas Edison)

The world is full of people who are waiting for someone to come along and motivate them to be the kind of people they wish they could be. The problem is that, "No one is coming to the rescue."

These people are waiting for a bus on a street where no busses pass. As a result, if they don't take charge of their lives and put the pressure on themselves, they can end up waiting forever. And that is what most people do.

Only about 2% of people can work entirely without supervision. We call these people "leaders." This is the kind of person you are meant to be.

Your job is to form the habit of putting the pressure on yourself, and not waiting for someone else to come along and do it for you. You must choose your own frogs and then make yourself eat them in their order of importance.

73

The standards you set for your own work and behavior should be higher than anyone else could set for you.

Make it a game with yourself to start a little earlier, work a little harder and stay a little later. Always look for ways to go the extra mile, to do more than you are paid for.

Your self-esteem, the core of your personality, has been defined by the psychologist Nathaniel Brandon as "your reputation with yourself."

You build up or pull down your reputation with yourself with everything you do, or fail to do. The good news is that you feel terrific about yourself whenever you push yourself to do your best,

whenever you go beyond where the average person would normally quit.

Imagine each day that you have just received an emergency message and that you will have to leave town tomorrow for a month. If you had to leave town for a month, what would you absolutely make sure got done before you left? Whatever it is, go to work on that task right now.

Imagine that you just received all-expenses paid vacation as a prize, but you will have to leave tomorrow morning on the vacation or it

74
will be given to someone else. What would you be determined to get finished before you left so that you could take that vacation? Whatever it is, start on that one job immediately.

Successful people continually put the pressure on themselves to perform at high levels. Unsuccessful people have to be instructed and supervised and pressured by others.

One of the great ways for you to overcome procrastination is by working as though you only had one day to get all your most important jobs done before you left for a month or went on vacation.

By putting the pressure on yourself, you accomplish more and better

tasks, faster than ever before. You become a high performance, high achieving personality. You feel terrific about yourself, and bit by bit, you build up the habit of rapid task completion that then goes on to serve you all the days of your life.

Eat That Frog! Set deadlines and sub-deadlines on every task and activity. Create your own “forcing system.” Raise the bar on yourself and don’t let yourself off the hook. Once you’ve set yourself a deadline, stick to it and even try to beat it.

Write out every step of a major job or project before you begin. Then determine how many minutes and hours you will require to

75

complete each phase. Organize your daily and weekly calendars to create time segments when you work exclusively on these tasks.

Chapter 14 - Maximize Your Personal Powers

“Gather in your resources, rally all your faculties, marshal all your energies, focus all your capacities upon mastery of at least one field of endeavor.”

(John Haggai)

The raw material of personal performance and productivity is contained in your physical, mental and emotional energies.

When you are fully rested, you can get two times, three times and five times as much done as when you are tired out.

Your body is like a machine that uses food, water and rest to generate energy that you then use to accomplish important tasks in your life and work.

One of the most important requirements for being happy and productive is for you to guard and nurture your energy levels at all times.

76

The rule is that your productivity begins to decline after eight or nine hours of work. For this reason, working long hours into the night, although it is sometimes necessary, means that you are usually producing less and less in more and more time. The more tired you get, the worse is your work and the more mistakes you make. At a certain point, like a battery that is run down, you can reach “the wall” and simply be unable to continue.

The fact is that you have specific times during the day when you are at your best. You need to identify these times and discipline yourself to use them on your most important and challenging tasks.

Most people are at their best in the mornings, after a good night's sleep. Some people are better in the afternoons. A few people are most creative and productive in the evenings or late at night.

A major reason for procrastination is fatigue, or attempting to start on a task when you are tired out. You have no energy or enthusiasm. Like a cold engine in the morning, you can't seem to get yourself started.

Whenever you feel overtired and overwhelmed with too much to do and too little time, stop yourself and just say, "All I can do is all I can do."

77

Sometimes the very best use of your time is to go home early and go to bed and sleep for ten hours straight. This can completely recharge you and enable you to get two or three times as much done the following day, and of a far higher quality, than if you had continued working long into the night.

According to many researchers, the average American is not getting enough sleep relative to the amount of work he or she is doing. Millions of Americans are working in a state of mental fog as the result of working too much and sleeping too little.

One of the smartest things you can do is to turn off the television and get to bed by ten o'clock each night during the week. Sometimes, one extra hour of sleep per night can change your entire life.

Here is a rule for you. Take one full day off every week. During this day, either Saturday or Sunday, you absolutely refuse to read, clear correspondence, catch up on things from the office or do anything else that taxes your brain. Instead, you go to a movie, exercise, spend time with your family, go for a walk or any activity that allows your brain to completely recharge itself. It is true that “a change is as good as a rest.”

78

Take regular vacations each year, both long weekends and one and two-week breaks to rest and rejuvenate. You are always the most productive after a weekend or a vacation.

Going to bed early five nights a week, sleeping in on the weekends and taking one full day off each week will assure that you have far more energy. This added energy will enable you to overcome procrastination and get started on your major tasks faster and with greater resolve than you ever could if you were tired out.

In addition, to keep your energy levels at their highest, be careful about what you eat. Start the day with a high protein, low fat and low carbohydrate breakfast. Eat salads with fish or chicken at lunch. Avoid sugar, salt, white flour products or deserts. Avoid soft drinks and candy bars or pastries. Feed yourself as you would feed a world class athlete before a competition, because in many respects, that's what you are before starting work each day.

By eating lean and healthy, exercising regularly and getting lots of rest, you'll get more and better work done, easier and with greater satisfaction than ever before.

The better you feel when you start work, the less you procrastinate and the more eager you are to get the job done and get on with other tasks. High energy levels are indispensable to higher levels of

productivity, more happiness and greater success in everything you do.

Eat That Frog! Make an analysis of your current energy levels and your daily health habits. Resolve today to improve your levels of health and energy by asking the following questions:

- 1) What am I doing physically that I should do **more** of?
- 2) What am I doing that I should do **less** of?
- 3) What am I not doing that I should **start doing** if I want to perform at my best?
- 4) What am I doing today that affects my health that I should **stop doing** altogether?

Whatever your answers are to these questions, take action today.
